PAWED Mobile Spay/Neuter and Community Partnering

So you ask, “What does it take to get the PAWED Mobile Spay/Neuter Clinic to come to your community?”

PAWED is focusing on outlying communities with little or no access to affordable s/n services.

Communities identified by EDC Animal Services, as a result of the number of unaltered strays picked up and the number of litters turned into the shelter from that area, are the top priority.

There must be community support for the project and a workable cooperative arrangement between the community and PAWED.

If community meets these criteria, then PAWED will visit the area to determine if there is a suitable facility that can be used at least one Sunday a month for the recovery of the animals after surgery.

What facilities & support are needed for the PAWED Mobile Spay/Neuter Clinic?

- **50 Amp RV outlet or ability to install one within 20’ of parking area**
- **Flat parking area for a 39’ long clinic**
- **Indoor temperature controlled space sufficient for the recovery of 4-6 dogs in crates (cats can be recovered inside the clinic)**
- **Additional parking space for volunteers and clients**
- **Cell phone service or an available telephone**
- **A local contact person(s) who can assist PAWED in site arrangements, client scheduling and clinic intake.**

If you think your community is a candidate please contact PAWED to see if we can work together to help your community. You may submit the attached application by email or regular mail to the appropriate address above.
